Agaricus mushroom: a specific production

1. Production of the mushroom substrate from straw and horse/chicken manure

2. Indoor mushroom growing

3. Spent Mushroom Substrate can be used as soil improver on agricultural fields

- **Mushroom growing is made year-round** in enclosed spaces with shelves or bags of substrate. The yield of *Agaricus* mushroom is about 27 kg/m^2 which is 270 ton/ha equivalent for 1 growing cycle. Usually, you can have 8-10 cycles a year.
